

NALMCO® CERTIFICATIONS

SETTING THE STANDARD FOR EXCELLENCE

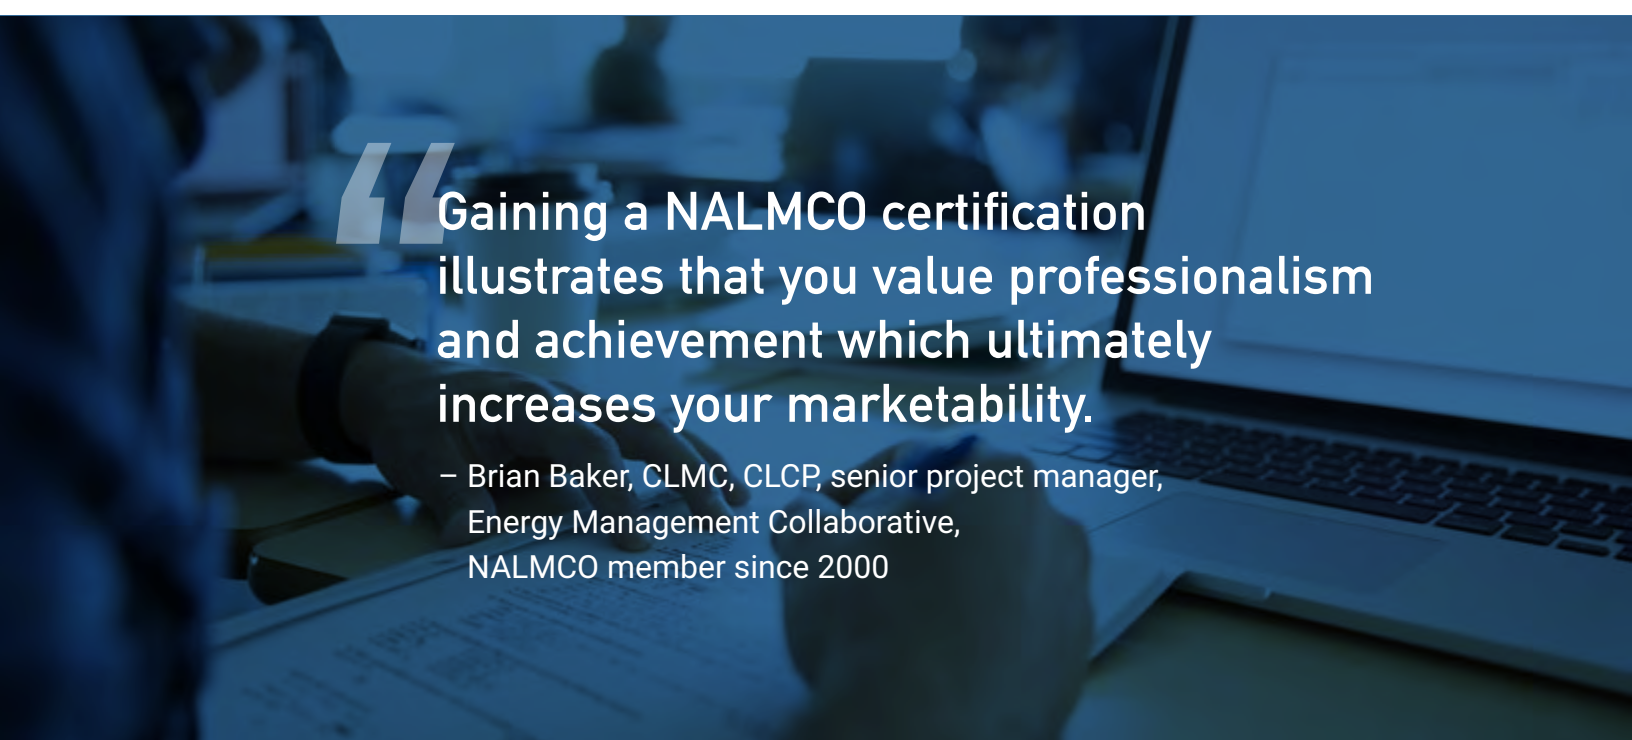

THE BEST OF THE BEST

NALMCO is committed to helping you become the best in your profession. That's why NALMCO was the first organization in the lighting industry to create nationally recognized professional lighting management certifications. The certifications identify you as a leader within the industry and prove to customers you're the most qualified for the job.

NALMCO's certifications were written by the industry's most knowledgeable lighting professionals. Each exam focuses on information and skills that are directly related to the work you perform every day.

NALMCO'S CERTIFICATIONS:

- 1 Offer cost-effective resources to train your staff.
- 2 Are convenient – study materials are available online, with technical certification exams offered online and our professional certification exam offered at locations throughout the U.S.
- 3 Allow you to stand out as an industry leader.
- 4 Acknowledge your achievements within the industry.

“Gaining a NALMCO certification illustrates that you value professionalism and achievement which ultimately increases your marketability.

– Brian Baker, CLMC, CLCP, senior project manager,
Energy Management Collaborative,
NALMCO member since 2000

CERTIFICATION OPPORTUNITIES

CERTIFIED APPRENTICE LIGHTING TECHNICIAN® (CALT®)

CERTIFIED SENIOR LIGHTING TECHNICIAN® (CSLT®)

NALMCO offers two self-paced certification programs indispensable for technicians: The Certified Apprentice Lighting Technician (CALT) and the Certified Senior Lighting Technician (CSLT). With these programs, you learn the basic (CALT) and advanced (CSLT) lighting and lighting management operations information.

Each program includes online access to the training manual, narrated content review session and exam. Once you successfully complete each program, you will receive a certificate of completion, wallet card and use of the designation after your name. The CALT is a prerequisite for the CSLT program.

CERTIFIED LIGHTING CONTROLS PROFESSIONAL™ (CLCP™)

Demand for LED lighting and advanced lighting controls is accelerating. As lighting and controls become increasingly complex, customers need qualified professionals. NALMCO's Certified Lighting Controls Professional (CLCP) designation provides assurance that a professional is highly educated about lighting controls based on high-quality curriculum designed by the controls industry. The CLCP is based on the education curriculum developed by the Lighting Controls Association (LCA). With this program, you will learn about lighting controls technology and application. This is an ideal program for project managers and auditors, sales professionals, lighting technicians, architects and IT professionals.

There is no cost to access LCA's Education Express. The program includes online access to the exam. Once you successfully complete the program you will receive a certificate of completion and use of the designation after your name.

CERTIFIED LIGHTING MANAGEMENT CONSULTANT® (CLMC®)

The Certified Lighting Management Consultant (CLMC) program recognizes members of the lighting management industry who have demonstrated superior knowledge and technical expertise. Obtaining the CLMC certification is one of the industry's greatest achievements. It is the oldest nationally-recognized lighting certification program in the nation, as well as the first to be accepted by EPA's ENERGY STAR®.

To be considered for certification you must complete the CLMC application and take a proctored computer-based exam. Prerequisites for the exam includes: a minimum of three (3) years performing in the capacity of a lighting management professional; experience in the lighting management industry in a position that directly affects the operation, modification, maintenance or design of a lighting system; adherence to the NALMCO Code of Ethics; and proof of ongoing continuing education and leadership within the lighting industry.

You may prepare for the exam by using NALMCO's Knowledge Center, an online database of lighting information, or by attending a Content Review Session held at NALMCO's Spring Seminar and Convention.
